

**Amendments to the Specification:**

**Please amend the paragraph bridging page 4, lines 24--page 5, line 2 as follows:**

Accordingly, the triple structure is provided, in which the intermediate protective cover is provided ~~for the cover of~~ between the double structure comprising the inner protective cover and the outer protective cover. Therefore, it is possible to effectively avoid the droplets of water produced upon the start-up of the engine.

**Please amend the paragraph on page 14, lines 6-11 as follows:**

Accordingly, the intermediate protective cover 20 is provided ~~for~~ between the ~~cover of~~ a double structure comprising the inner protective cover 16 and the outer protective cover 18, thereby providing a triple structure. Therefore, it is possible to effectively avoid the droplets of condensed water produced upon the start-up of the engine.
